#### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

#### **General information**

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice.

#### In case of inhalation

Remove casualty to fresh air and keep warm and at rest. In case of irregular breathing or respiratory arrest provide artificial respiration.

#### Following skin contact

Take off immediately all contaminated clothing. After contact with skin, wash immediately with plenty of water and soap. Do not use solvents or thinners.

#### After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.

#### **Following ingestion**

If swallowed, rinse mouth with water (only if the person is conscious). Seek medical advice immediately. Keep victim calm. Do NOT induce vomiting.

#### 4.2. Most important symptoms and effects, both acute and delayed

In all cases of doubt, or when symptoms persist, seek medical advice.

4.3. **Indication of any immediate medical attention and special treatment needed** First Aid, decontamination, treatment of symptoms.

GB Page 3 / 14

# SECTION 5: Firefighting measures

# 5.1. Extinguishing media

#### Suitable extinguishing media

alcohol resistant foam, carbon dioxide, Powder, spray mist, (water)

#### Unsuitable extinguishing media

strong water jet

#### 5.2. Special hazards arising from the substance or mixture

Dense black smoke occurs during fire. Inhaling hazardous decomposing products can cause serious health damage.

#### 5.3. Advice for firefighters

Provide a conveniently located respiratory protective device. Cool closed containers that are near the source of the fire. Do not allow water used to extinguish fire to enter drains, ground or waterways.

#### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition. Ventilate affected area. Do not breathe vapours.

#### 6.2. Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations.

#### 6.3. Methods and material for containment and cleaning up

Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see section 13). Clean using cleansing agents. Do not use solvents.

#### 6.4. Reference to other sections

Observe protective provisions (see section 7 and 8).

#### **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

#### Advices on safe handling

Avoid formation of flammable and explosive vapour concentrations in the air and exceeding the exposure limit values. Only use the material in places where open light, fire and other flammable sources can be kept away. Electrical equipment must be protected meeting the accepted standard. Product may become electrostatically charged. Provide earthing of containers, equipment, pumps and ventilation facilities. Anti-static clothing including shoes are recommended. Floors must be electrically conductive. Keep away from heat sources, sparks and open flames. Use only spark proof tools. Avoid contact with skin, eyes and clothes. Do not inhale dusts, particulates and spray mist when using this preparation. Avoid respiration of swarf. When using do not eat, drink or smoke. Personal protection equipment: refer to section 8. Do not empty containers with pressure - no pressure vessel! Always keep in containers that correspond to the material of the original container. Follow the legal protection and safety regulations.

#### **Further information**

Vapours are heavier than air. Vapours form explosive mixtures with air.

#### 7.2. Conditions for safe storage, including any incompatibilities

#### Requirements for storage rooms and vessels

Storage in accordance with the Ordinance on Industrial Safety and Health (BetrSiVO). Keep container tightly closed. Do not empty containers with pressure - no pressure vessel! Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks. Soils have to conform to the "Guidelines for avoidance of ignition hazards due to electrostatic charges (TRGS 727)".

#### Hints on joint storage

Keep away from strongly acidic and alkaline materials as well as oxidizers.

#### Further information on storage conditions

Take care of instructions on label. Store in a well-ventilated and dry room at temperatures between 15 °C and 30 °C. Protect from heat and direct sunlight. Keep container tightly closed. Remove all sources of ignition. Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks.

#### 7.3. Specific end use(s)

Observe technical data sheet. Observe instructions for use.

#### Personal protection equipment

#### **Respiratory protection**

If concentration of solvents is beyond the occupational exposure limit values, approved and suitable respiratory protection must be used. Use only respiratory protection equipment with CE-symbol including four digit test number.

#### Hand protection

For prolonged or repeated handling the following glove material must be used: NBR (Nitrile rubber)

Thickness of the glove material > 0,4 mm ; Breakthrough time: > 480 min.

Observe the instructions and details for use, storage, maintenance and replacement provided by the protective glove manufacturer. Penetration time of glove material depending on intensity and duration of exposure to skin. Recommended glove articles EN ISO 374

Barrier creams can help protecting exposed skin areas. In no case should they be used after contact.

#### Eye/face protection

Wear closely fitting protective glasses in case of splashes.

#### Body protection

Wear antistatic clothing of natural fibers (cotton) or heat resistant synthetic fibers.

#### Protective measures

After contact clean skin thoroughly with water and soap or use appropriate cleanser.

#### **Environmental exposure controls**

Do not allow to enter into surface water or drains. See section 7. No additional measures necessary.

#### **SECTION 9: Physical and chemical properties**

#### 10.1. Reactivity

No information available.

# 10.2. Chemical stability

Stable when applying the recommended regulations for storage and handling. Further information on correct storage: refer to section 7.

#### 10.3. Possibility of hazardous reactions

Keep away from strong acids, strong bases and strong oxidizing agents to avoid exothermic reactions.

#### 10.4. Conditions to avoid

Hazardous decomposition byproducts may form with exposure to high temperatures.

# 10.5. **Incompatible materials** not applicable

#### 10.6. Hazardous decomposition products Hazardous decomposition byproducts may form with exposure to high temperatures, e.g.: carbon dioxide, carbon monoxide,

eyes Method: OECD 405 Causes serious eye irritation. 2-methylpropan-1-ol Skin, Rabbit Method: OECD 404 Causes skin irritation. eyes, Rabbit

propan-2-ol

Method: OECD 405 Causes serious eye irritation.

# Respiratory or skin sensitisation

2-methylpropan-1-ol Skin: not sensitising. Respiratory system: not sensitising.

#### CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)

Based on available data, the classification criteria are not met.

#### STOT-single exposure; STOT-repeated exposure

May cause drowsiness or dizziness.

#### dimethyl ether

Specific target organ toxicity (single exposure), drowsiness Evaluation May cause drowsiness or dizziness. literature value

#### 1-methoxy-2-propanol

Specific target organ toxicity (single exposure), drowsiness May cause drowsiness or dizziness.

#### Ethyl acetate

Specific target organ toxicity (single exposure), drowsiness

May cause drowsiness or dizziness.

#### propan-2-ol

Specific target organ toxicity (single exposure), drowsiness Evaluation central nervous system May cause drowsiness or dizziness.

#### n-butyl acetate

Specific target organ toxicity (single exposure), drowsiness May cause drowsiness or dizziness.

#### 2-methylpropan-1-ol

Specific target organ toxicity (single exposure), Irritation May cause respiratory irritation. Specific target organ toxicity (single exposure), drowsiness May cause drowsiness or dizziness.

#### Aspiration hazard

Based on available data, the classification criteria are not met.

#### Practical experience/human evidence

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

#### **Overall assessment on CMR properties**

The ingredients in this mixture do not meet the criteria for classification as CMR category 1A or 1B according to CLP.

#### 11.2. Information on other hazards

#### Endocrine disrupting properties

No information available.

# **SECTION 12: Ecological information**

Classification according to Regulation (EC) No 1272/2008 [CLP] Do not allow to enter into surface water or drains. 12.1. Toxicity (2-methoxymethylethoxy)propanol Fish toxicity, LC50, Poecilia reticulata (Guppy): > 1000 mg/L (96 h) Method: OECD 203 Daphnia toxicity, EC50, Daphnia magna (Big water flea): 1919 mg/L (48 h) Method: OECD 202 Algae toxicity, ErC50, Pseudokirchneriella subcapitata: > 969 mg/L (96 h) Method: OECD 201 Bacteria toxicity, EC10, Pseudomonas putida: 4168 mg/L (18 h) Based on available data the classification criteria are not met. 1-methoxy-2-propanol Fish toxicity, LC50, Leuciscus idus (golden orfe): 6812 mg/L (96 h) Based on available data, the classification criteria are not met. Daphnia toxicity, EC50, Daphnia magna (Big water flea) 21100 - 25900 mg/L (48 h) Based on available data, the classification criteria are not met. Algae toxicity, ErC50, Pseudokirchneriella subcapitata: > 1000 mg/L (168 h); Evaluation Inhibition of growth rate. Method: OECD 201 Ethanol Fish toxicity, LC50, Pimephales promelas (fathead minnow): 15300 mg/L (96 h) Daphnia toxicity, EC50, Daphnia magna (Big water flea): 12340 mg/L (48 h) Algae toxicity, ErC50, Chlorella vulgaris: 275 mg/L (72 h) Method: OECD 201 Bacteria toxicity, EC50, Pseudomonas putida: 5800 mg/L (4 h) Based on available data, the classification criteria are not met. Ethvl acetate Fish toxicity, LC50, Pimephales promelas (fathead minnow): 230 mg/L (96 h) Daphnia toxicity, EC50, Daphnia magna (Big water flea): 610 mg/L (48 h) Algae toxicity, ErC50, Desmodesmus subspicatus: 5600 mg/L (48 h) Based on available data, the classification criteria are not met. propan-2-ol Fish toxicity, LC50, Pimephales promelas (fathead minnow): 9640 mg/L (96 h) Method: OECD 203 Daphnia toxicity, EC50, Daphnia magna (Big water flea): > 100 mg/L (48 h) Algae toxicity, ErC50, Scenedesmus subspicatus: > 100 mg/L (72 h) Based on available data, the classification criteria are not met. n-butyl acetate Fish toxicity, LC50, Pimephales promelas (fathead minnow): 18 mg/L (96 h) Method: OECD 203 Daphnia toxicity, EC50, Daphnia magna (Big water flea): 44 mg/L (48 h) Method: OECD 202 Algae toxicity, EC50, Desmodesmus subspicatus.: 397 mg/L (72 h) Method: OECD 201 Based on available data, the classification criteria are not met. 2-methylpropan-1-ol Fish toxicity, LC50, Pimephales promelas (fathead minnow): 1430 mg/L (96 h) Daphnia toxicity, EC50, Daphnia magna (Big water flea): 1100 mg/L (48 h) Algae toxicity, ErC50, Pseudokirchneriella subcapitata: 632 mg/L (72 h) Method: OECD 201 Based on available data, the classification criteria are not met. Long-term Ecotoxicity (2-methoxymethylethoxy)propanol Daphnia toxicity, NOEC, Daphnia magna (Big water flea): > 0,5 mg/L (22 D)

Based on available data the classification criteria are not met.

#### **Bioconcentration factor (BCF)**

(2-methoxymethylethoxy)propanol

Bioconcentration factor (BCF): < 100 Ethanol

Bioconcentration factor (BCF): 0,66

No indication of bioaccumulation potential.

#### 12.4. Mobility in soil

propan-2-ol

. water-soluble

#### 12.5. Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

# 12.6. Endocrine disrupting properties No information available.

#### 12.7. Other adverse effects

No information available.

# **SECTION 13: Disposal considerations**

#### 13.1. Waste treatment methods

#### Appropriate disposal / Product

#### Recommendation

Do not allow to enter into surface water or drains. This material and its container must be disposed of in a safe way. Waste disposal according to directive 2008/98/EC, covering waste and dangerous waste. Dispose of waste according to applicable legislation.

#### List of proposed waste codes/waste designations in accordance with EWC

150110\* packaging containing residues of or contaminated by dangerous substances

\*Hazardous waste according to Directive 2008/98/EC (waste framework directive).

#### Appropriate disposal / Package

# Recommendation

Non-contaminated packages may be recycled. Vessels not properly emptied are special waste.

# **SECTION 14: Transport information**

#### 14.1. UN number or ID number

14.2. UN proper shipping name

UN 1950

17.2.	Land transport (ADR/RID): Sea transport (IMDG):	Aerosols, flammable AEROSOLS	
	Air transport (ICAO-TI / IATA-DGR):	Aerosols, flammable	
14.3.	Transport hazard class(es)		
		2.1	
14.4.	Packing group		
		not determined	
14.5.	Environmental hazards		
	Land transport (ADR/RID)	not determined	
	Marine pollutant	not determined	
14.6.	Special precautions for user		
	Transport always in closed upright and safe containers. Make sure that		

Transport always in closed, upright and safe containers. Make sure that persons transporting the product know what to do in case of an accident or leakage. Advices on safe handling: see parts 6 - 8

#### Sea transport (IMDG)

EmS-No.

F-D, S-U

#### 14.7. Maritime transport in bulk according to IMO instruments

No transport as bulk according IBC - Code.

# **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### **EU** legislation

**Directive 2010/75/EU on industrial emissions [Industrial Emissions Directive]** VOC-value (in g/L): 738

# National regulations

#### **Restrictions of occupation**

Observe employment restrictions under the Maternity Protection Directive 92/85/EEC or stricter national regulations, if applicable.

Observe restrictions to employment for juveniles according to the 'juvenile work protection guideline' (94/33/EC) or stricter national regulations, if applicable.

#### 15.2. Chemical Safety Assessment

#### For the following substances of this mixture a chemical safety assessment has been carried out:

EC No. Designation		REACH No.

#### **Further information**

Classification according to Regulation (EC) No 1272/2008 [CLP]

The information supplied on this safety data sheet complies with our current level of knowledge as well as with national and EU regulations. Without written approval, the product must not be used for purposes different from those mentioned in section 1. It is always the user's duty to take any necessary measures for meeting the requirements laid down by local rules and regulations. The details in this safety data sheet describe the safety requirements of our product and are not to be regarded as guaranteed attributes of the product.
